

THE HERRICK HOUSE

The Herrick House at Beverly is a 90 unit "full service" assisted living facility. Common areas include fine dining, meeting areas, a cafe, landscaped courtyards, a pub, library, sitting rooms and lounges. The facility also includes amenities such as laundry rooms, a spa-exercise area and a beauty / barber shop.

The design is characterized by dramatic, sheltering roof forms, and natural materials such as wood shingles for its cladding. Not only does this expression root the architecture to its site, but also connects the entire ensemble with the noble New England building traditions famous throughout the country.
